### **PETS**

There are many types of pets. Some are dogs, cats, goldfish, turtles, rabbits, parakeets, etc.

A good pet is chosen with a great deal of care. To be comfortable, a pet must have the proper food, and a clean place to stay.

When choosing a pet, ask yourself these questions: Will the right food be hard to get? Will it be likely to hurt someone? Will it be a nuisance because it makes too much noise? Is this animal the right size for the home in which it is going to live?

Most people seem to want a playful pet. Cats and dogs are the best choices. Tropical fish are interesting to raise and care for, but they're not the kind of pets to play with.

If a person wants a dog or cat, there are many kinds to select from. Short-haired dogs are easier to keep, and are best for cities. Such dogs are Beagles, Boston terriers, Dachshunds, Chihuahuas, and Boxers. Great Danes are short-haired, but are big for city living. Cockers and Scotties are long-haired, and are better off away from crowded, dirty streets. Setters and Collies are good country dogs.

No house cats are too big for cities but, short-haired cats are much easier to take care of than the long-haired ones.

Pets are often bothered by pests such as ticks, fleas, and lice. Taking good care of your pets help to prevent these pests.

Ticks are not only a nuisance but also a menace because they carry disease. Fleas are not harmful to the animal, they are just a nuisance. Lice are also a disease carrier. They are very small and their eggs stick to the animal's coat.

Goldfish are a lot easier to care for than tropical fish. They live just as well in a fish pond outdoors, as they do indoors in a bowl. Most are gold but some are black, silver, or red.

Fashions change in pets. Parakeets are now more popular than parrots. Pug dogs were very common, but now there are not very many of them.

### *Here are some facts about Saturn*

Some people think that Saturn is the strangest and most beautiful planet. It does look different from the others. It has three big rings around its middle. Galileo saw the rings first. They are made of millions of tiny bodies too small to be seen by telescopes from the earth. Saturn is 736 times as big as the Earth, but it is probably not solid like the Earth. Astronomers believe that Saturn is made of gas or liquid. It takes thirty Earth years for Saturn and its nine moons to revolve once around the sun. Saturn rotates about as fast as Jupiter, once in every ten hours. Saturn is 885 million miles from the sun. It is very cold on Saturn. The temperature is about 300 degrees below zero.

**THIRD PRIZE — \$2.00**

**REPORTER**  
**CINDY FOLLIS**

Burbank, Calif.

**THE LIPIZZAN**

The Lipizzan is a powerfully built horse, yet is the ballet dancer of the horse kingdom.

The foals are left with the mare until they are four years old. This is so all the playfulness and foolishness is out of them and they are ready to work. The coat of the foal is brown and gradually it lightens to white.

Only the stallions are trained and only the strongest of these stallions go on to learn the hardest steps of this world famous horse ballet.

The riders sit so straight because for many years they wore coats with steel bars sewn in them.

The rider seems to sit as still as a statue

in the saddle but he is constantly giving commands to the horse with his knees.
